Summary

I am a front-end developer with three years of experience creating web apps and websites. I pay close attention to details and always write clean, DRY, testable, cross-browser compatible and scalable codes.

My stacks include React.js, Redux, React native, SASS, JavaScript, CSS, HTML, Git, Github and development tools like Babel, Webpack, Parcel, Jest and Enzyme for testing. I also have experience working with AGILE methodology and remote-based team environment.

I also have little experience with React Native, Node, Express, SQL and MongoDB.

Thank you.

Experience

Frontend Developer

FitSit

Dec 2021 - Present (7 months +)

Fitsit is an online digital physiotherapy web application that corrects user posture using advance Machine Learning model.

Being the only frontend developer on the project, I developed the pages with React and SASS, handled state management with Redux, added translations using i18next, handled error, socket connection and every other things regarding frontend.

Used AGILE methodology, connected with backend, cloud and design teammates, worked fully remote. The project is a success and live in production.

Frontend Developer

Digital Dada

Jan 2020 - Dec 2021 (2 years)

Developed various website for company's clients.

Fixed design and application bugs from the Q and A teams to improve design and performance and satisfy the client's need.

Accomplished better code quality under the supervision and mentoring of senior developers.

Skills

React.js • Redux.js • JavaScript • SASS • Git • Cascading Style Sheets (CSS) • HTML5 • Node.js • Express.js • MongoDB
