Summary

I am a front-end developer with three years of experience creating web apps and websites. I pay close attention to details and always write clean, DRY, testable, cross-browser compatible and scalable codes.

My stacks include Next.js, React.js, Redux, React native, SASS, TypeScript, JavaScript, CSS, HTML, Git, Github and development tools like Babel, Webpack, Parcel, Jest and Enzyme for testing. I also have experience with React Native, Node, Express, SQL and MongoDB.

Experience

Frontend Engineer

FitSit

Dec 2021 - Present (1 year 2 months)

- FitSit is an online digital physiotherapy web application that corrects user posture using advance Machine Learning model.
- Lead frontend developer, developed pages with React and SASS, handled state management with Redux, added translations using i18next, handled error, socket connection.
- Used AGILE, connected with backend, cloud and design teammates, worked fully remote

Frontend Engineer

Entre

Jul 2022 - Nov 2022 (5 months)

- Built a fully functional blog using Next.js, TypeScript and SASS on the frontend integrated with a headless CMS backend.
- Contributed to building the platform by fixing UI and technical bugs, coding out new designs, adding more functionalities and features.
- Collaborated with product team members to implement new feature developments.

Frontend Developer

Digital Dada

Jan 2021 - Sep 2021 (9 months)
