## WORK EXPERIENCE

**Software Developer**                                                                December  2021 – Present
FitSit · Prague, Czech (Remote)

- Led frontend development using React and SASS, implementing authentication, security, and state management with Redux. Improved user experience by overhauling >90% of the UI/UX codebase for reliability and cross-browser consistency.
- Coordinated effectively with backend, cloud, and design teams within an AGILE methodology while working fully remote. Successfully added translations using i18next to support multiple languages, and handled error and socket connections with  precision.
- Spearheaded enhancements to the frontend codebase at FitSit as a Lead Developer, tuning every other aspect of frontend development to improve the speed and overall functionality of the website.

**Software Developer**                                                                July 2022 – November 2022
Entre · Pittsburgh, Pennsylvania, United States (Remote)

- Developed a high-performing blog using Next.js framework, leveraging SEO best practices to achieve top Google search ranking and increase organic reach.
- Collaborated closely with cross-functional teams (product managers, designers, software engineers) to enhance platform functionality and user experience while performing code review and pair programming.
- Troubleshooted UI and technical issues and implemented new designs resulting in seamless platform performance.

**Junior Software Developer**                                                        January 2021 – September 2021
Digital Dada · Florida, United States (Remote)

- Developed websites for the company's clients improving customer satisfaction by >20%.
- Fixed design and application bugs from the QA teams to improve design and performance and satisfy the client's needs.
- Accomplished better code quality under the supervision and mentoring of senior engineers and learning from given resources.
