SUMMARY

Frontend Engineer with 4 years of experience building and maintaining web and mobile applications. Strong in Next.js, React, TypeScript, JavaScript, and modern CSS. Hands-on with backend services using Node.js, Golang, MongoDB, GCP, and AWS. Led frontend for a digital physiotherapy product and shipped an SEO-optimized blog that reached Google's first page in two weeks. Clear communicator and collaborative team player with strong English skills.

WORK EXPERIENCE

Volunteer Frontend Engineer — New York, United States (Remote)
iHealth and Wellness Foundation — *Oct. 2025 - Dec. 2025*

- Revamped and refactored 10 pages and 54 React components to use a new and improved UI design system and CSS Modules, improving code quality and scalability.
- Built 6 new mobile-responsive React pages from Figma designs and wireframes to support the company's humanitarian mission.

Founding Frontend Engineer — Prague, Czech (Remote)
FitSit — *Dec. 2021 - Aug. 2024*

- Led frontend development using React and SASS, implementing authentication, security, and state management with Redux. Improved user experience by overhauling >90% of the UI/UX codebase for reliability and cross-browser consistency.
- Coordinated effectively with backend, cloud, and design teams within an AGILE methodology while working fully remote. Successfully added translations using i18next to support 4 languages, and handled error and socket connections with precision.
- Spearheaded enhancements to the frontend codebase at FitSit as a Lead Frontend Engineer, tuning every other aspect of frontend development to improve the speed and overall functionality of the website.

Frontend Engineer — Pittsburgh, Pennsylvania, United States (Remote)
Entre — *Jul. 2022 - Nov. 2022*

- Developed a high-performing blog using Next.js framework, leveraging SEO best practices to achieve top Google search ranking and increase organic reach.
- Collaborated closely with cross-functional teams (product managers, designers, software engineers) to enhance platform functionality and user experience while performing code review and pair programming.
- Troubleshooted UI and technical issues, implementing designs that enhanced platform performance.

Frontend Engineer Intern — Florida, United States (Remote)
Digital Dada — *Jan. 2021 - Sept. 2021*

- Developed websites for the company's clients improving customer satisfaction by >20%.
- Fixed design and application bugs from QA to improve performance and align with client requirements.
- Improved code quality through mentorship from senior engineers and utilizing provided resources.

EDUCATION

Bachelor of Science in Geology — Ile-Ife, Nigeria
Obafemi Awolowo University — *2019 - 2024*
